

11-27-15 ---Thanksgiving Holiday weekend...not supposed to trade, but observing this “Harmonic event” in process...we will see...”The plot thickens”.....we’re making notes on the charts and learning...realizing that since we are working with completed patterns, that measuring and enjoying the process of things is great...like John Coltrane would playin’ his horn...we’ll learn about how our .382 target “set n forget” works as we go....remember lots of Folks target the .618, so, this is a valid trade of 1:1 risk/reward, we are just targeting the .382 ☺

EURCHF

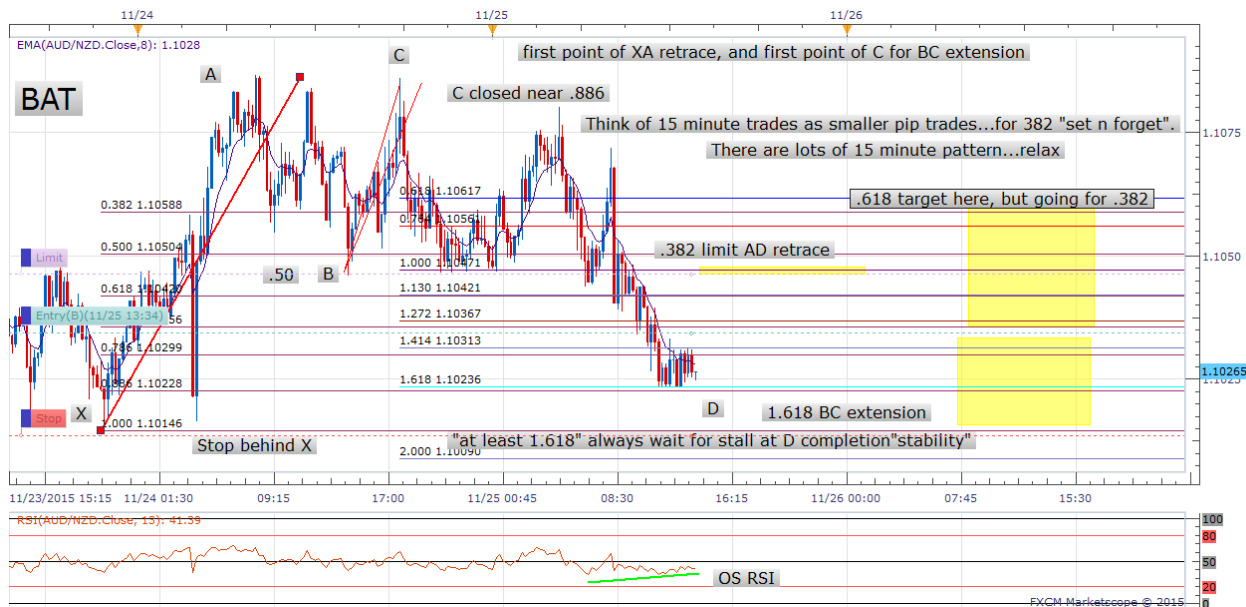

Next page has the Crab harmonic pattern ratio alignments, but price “Broke and closed” above where stabilization was to be, so no trade...(Heartbeats have harmonic patterns too ☺)

The chart above is one that we measured, but price has not stabilized...rule is no trading too near Thanksgiving anyway...should not have tried this one, as price "Broke and Closed" the level, and is not "Stabilized" at the level...so lesson is...no trading near the Holiday, and if price has not stabilized...Folks would say..."Yup, well, yes, that's the rule"... "knock knock"... "We know, just havin' fun Kid"...much love and peace on Earth... ☺

Here's a great "Don't trade the Holiday time, but what can we learn as Grasshoppers" lesson...

AUDNZD

We notice a good lesson below about how RSI was not in the “trade trigger zone” ...easy to trick ourselves into a trade...“making excuses”...ha...ha...we’re human funny bones...much love... ☺

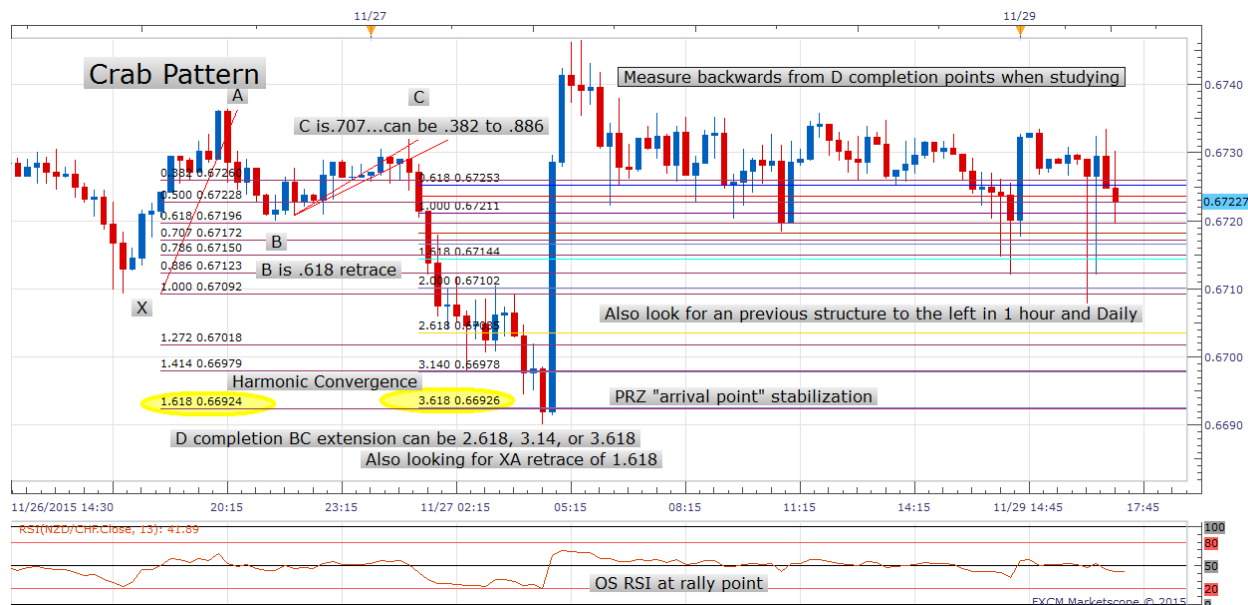

Here’s a miraculous USDJPY Gartley XA retrace is .618 and C point is .50, which implied a BC extension of 2.0 (according to Harmonic guidelines of .50 C point transferring power into a 2.0 BC extension into a D completion)...show nuff price did it’s thang....incredible stuff...price really rallied too...great risk reward on this one...Awesome... ☺

Here's a cool Crab Pattern with notes: Took a while to measure the ratio alignments...figured it's best to measure the D Completion and backwards from there...

NZDCHF 15 minute....there's a lot of 15 minute patterns all the time Folks....Farrrrr out Man...! ☺

Since we were talking about C point (AB retrace) and the price movement BC extension power....Here are the "Harmonic Guidelines" to look for...harmonic patterns "occur with remarkable consistency"...as Prechter says about wave 3 behavior..."A wonder to behold" ☺

So, once we have a C point....try the BC Fibonacci extension, and see if price stabilizes there ☺

(Measure C to B and back to C)

| <u>C point</u> | <u>BC Projection</u> |
|----------------|----------------------|
| .382 | 2.24 and 2.618 |
| .50 | 2.0 |
| .618 | 1.618 |
| .707 | 1.414 |
| .786 | 1.27 |
| .886 | 1.13 |

Cool...so, enjoy the joy of your peace....take care from Mother/Father Owl Collective this morning Bub ☺

“For the Scripts and Raps” ...side note thoughts...Our Charts and Flowz are one experience often, which is why someday in a couple years when we put together an online class, it will be minimal correspondence, because no many people want to hear all the Airspace stuff...1love...peace

Matthew 10:13 “If they don’t receive your peace, let it return to you” ...and this morning, we were blessed to be reminded about 2nd Corinthians 10:17 “If we boast of anything, boast of the Lord” ...and it dawned upon us...“Oh, right...Brotha 17...” ...just like K is a gift from God that brings us back to Family...BrothaGod17...2 scriptures “Juncture scriptures” ... to get us re-oriented...God help us ☺ We’ll love this one through Guys....cool...1love...peace

This just in...

EURCHF trade worked...God the Glory...

Cool...so, nice n easy...try to stay loving to yourself and others and stay clear of the negative...1People...1peace...Harmonic Ministries..."Love is in the Air" ...peace
