Outro

Peace to "Urban Monks" and "Married to the Music", let's claim the victory...we know it's new fissures of confusion and agitation, yet it's the same Rapture laws to any daily threat...it's build or destroy, it's okay to be U. Treasures in Heaven...a life of service...and remember, the "unreconciled Men of Perdition Political entertainment plague bringers" is what it's always been denying virus science and normalizing plagues...yet in the Harvest of light, it's still a footstool, so be safe. Love and peace to "Island of Patmos" Revelations....Humor and history, honestly, can help "cancel culture", not just madness...let's encourage each other. Though Men of Perdition is at war with diversity and democracy...Family love is what shines through time, and take comfort knowing that real service people, who take an oath of office in surveillance, and God's surveillance, which is subject to spiritual laws, will outshine the glitch overtime.  
Peace
