Outro:

Peace Team. Giving thanks that we know to give thanks and encourage each other. One day at a time. We see that there is a clear difference between our special Owl in peace intuition love, and that of scarcity's selfish calculations. We find now that as we speak peace, division tries to take it, it steps closer to revelations reconciliation at the same time. God the glory, call it Providence or Luck. It's all love. The world understands better now that if all that a leader is doing is trying to discredit or dismiss the Free Press, Educators and Scientists, like the totalitarian voices of before? We learn that words and behavior have effects on the world (because chump and sleeper tampers says that nothing effects anything, and that the world is just a mess already, and oh well, nothing matters junk etc...). Nothing is new under the sun. Peace with us. 1
