

Good day.

The Momentum Flow Build w/ FVG v2 indicator

shows the previous session levels of Asia and London,
and the 5 min NY open levels (for 15 min go to 15 min chart).

The indicator also shows the FVGs.

The idea is that if price reaches a key level, we then
watch the level for whether price respects FVGs with a
retracement and engulfing candle at the FVG, or whether
price inverts the FVG (IFVG).

Cool. Be encouraged. Peace
