

Announcing: MFB - Maximization Prophet

The Process is the Peace. The Risk Management is the Win.

The **MFB - Maximization Prophet** is a dedicated Risk Management co-pilot designed to transform discretionary "gut-feeling" into mechanical, probabilistic execution. It is built for traders who understand that true wealth isn't generated at the entry, but through the disciplined protection of capital once a trade is live.

The Probabilistic Mindset: Why Risk Wins

Trading is a game of probabilities, not certainties. By using the **Universal MFB** logic to identify liquidity sweeps and continuation flows, you have found a high-probability entry. The Prophet ensures that your management of that entry remains just as high-probability by enforcing a strict, 4-tier protection process:

1. **The Anchor (Initial SL):** Automatically sets your risk based on the high-probability 5-minute closure candle extremity.
2. **The Safety Lock (B.O.S. to BE):** Locks your trade at Break-Even the moment market structure breaks in your favor.
3. **The Shield (Protected FVG Trailing):** Aggressively trails your stop behind "energetic" momentum gaps (FVGs) that are respected by price.
4. **The Cinch (Key Level Adjustment):** Tightens your risk to the previous candle the moment price reaches a major structural Key Level.

The Temporal Edge: The Golden Windows (if selected in settings)

To ensure you are trading when the statistical edge is at its highest, the indicator highlights (may also be set to only show within) **6 High-Probability Trading Windows (EST)**:

- **NY Morning Volume (07:30 - 09:00):** Capturing the London/NY overlap and opening manipulation.
- **London Open (02:00 - 05:00):** Institutional sweeps of Asian session levels.
- **London Close Reversals (10:00 - 11:00):** Profit-taking and trend reversals.
- **Afternoon Repositioning (13:30 - 15:00):** Clean distributions and afternoon runners.
- **NY Opening Range (09:30 - 09:45):** The critical 15-minute liquidity imbalance.
- **Sunday Gap Fills (18:00 - 00:00):** Weekly opening transitions.

Finding Peace in the Flow

By automating these exact rules, the **Maximization Prophet** ensures you never "hope" or "fear." You simply follow a precise red line that represents the highest mathematical probability of success. When you combine the **Universal MFB**'s ability to catch the "Flow" with the **Prophet**'s ability to protect the "Profit," you stop being a gambler and start being a professional trader.

Trust the Process. Follow the Prophet. Find the Peace.
