

Peace – Here are the charts from a NY session trade on 7-23-26. There were lots of other charts, yet here is the “Gist” of the session, where I took a trade.

The “Long Story Longer” of it, is that price was mostly within the 15 min opening range high and low, then the 5 min chart candle closed outside the 15 min Opening range low, and there was a 1 min FVG-123 trade entry signal.

Price was “Accepted” beyond the 15 min opening range low.

Its all about levels, and how price responds to the levels.

I then practiced Risk Management for a win. Cool. Peace.
