

Market Awareness Potential (M.A.P.)

I have been processing ideas regarding Market Awareness Potential.

1. **Value** — Is price Above/below VAH/VAL or balanced (within range)? - This is the NY Previous Day's Fixed Range Volume Profile.
2. **Liquidity** — What key level liquidity is still available (has not been taken yet)?
3. **Intention** — How did London trade relative to Asia H/L? **Acceptance or reversal?** (May see Asia session High/Low as we view the 15 min minute opening range high and low)
4. **Liquidity References** — Where did NY open relative to Asia/London range? Agreement or disagreement?
5. **Opportunity/Momentum** — CISD/FVG-123 response at key levels
- 6.

Reading:

Continuation (Acceptance beyond Asia high/low)

Reversal (Did London session sweep Asia High/Low and immediately reverse? Price may be reaching for the opposing Asia high/low)

Balanced (Is London within the Asia high/low range? "Balanced until proven otherwise" -if price displaces a level that is)

More “M.A.P.” learning:

1. Value - Did price open above VAH, below VAL, or within value? → Bullish acceptance / Bearish acceptance / Balanced

2. Liquidity - What liquidity is still available at key levels? → Which side has unfilled liquidity targets remaining?

3. Intention - How did London trade relative to the Asia high/low range? → Did London accept above/below Asia H/L, or reverse from it? (*Asia H/L = opening range reference — acceptance or ranging*)

4. Liquidity References Where did NY open relative to the Asia/London range? → Did NY open above, below, or within? → Does NY agree or disagree with London's behavior? (*London reversal at Asia H/L may continue in NY toward opposing liquidity*)

5. Opportunity/Momentum How is price responding at key levels? → CISD / FVG-123 confirmation

Market Reading:

- A) Continuation Potential
- B) Reversal Potential
- C) Balanced Potential (*unless proven otherwise through key level displacement*)

The market reading is A) Continuation potential B) Reversal Potential C) Balanced potential (unless proven otherwise through key level displacement)

Peace -
