

IF/THEN and A.B.C. Trading System Peace

I had a chat with the Trade Assistant, and this is what I decided on for this week, for trading with the “**MFB – Universal I.B.**” indicator (For 5 min chart **CISD reversal trades**) and “**Universal MFB – Flow/Sweep/FVG-123 Setup**” for **continuation trades** (FVG-123 if there is a break, retrace, and **continuation** at a key level.

“**IF/THEN**” is a mechanical key level response process –

IF/THEN – The “Reversal” trade

IF – 5 min CISD at a key level

THEN – Reversal trade entry – (Any Opening Range level confluence is added “support”, considering that the 5 min CISD at a key level “is its own framework”)

Risk management is the “2R” rule (2 min chart) – if price reaches the 2R, then move stop loss to the candle before the 2R (or nearest FVG). Trailing FVGs on the 2 min chart works too. If an FVG is an IFVG – then momentum changed.

IF/THEN - The Continuation trade

IF – Price breaks a key level, and a **5 min chart FVG-123** beyond the key level.

THEN – Continuation trade entry.

Risk Management is the same “2R” rule as with the Reversal Trade entry.

*Now the “Awareness” consideration – (**not necessary, yet interesting, because there is good trade opportunity**)*

A.B.C. (Awareness Builds Confidence)

MFB – Value Reading Session at 9:30am EST

What is the Fixed Range Volume Profile shape for the previous day’s NY session, and does it align with where price opened? Has the session opened beyond the VAH or VAL, with a supportive “Profile Shape”? If so, then if there is a retrace to the VAH or VAL, and a 5 min FVG-123, then that is a good continuation trade setup.

MFB – Value Reading Session I.B. at 10:30am

(Same idea as with the 9:30am Volume Profile reading)

VWAP Awareness – “Continuation” or “Reversal” potential

How far does price travel from VWAP? – Is there a “Potential Reversal Opportunity” or “Potential Continuation Opportunity”? If price is far from VWAP and near a key level, maybe **Reversal**? If not, maybe **Continuation**.

The market tends to “Re-balance” and VWAP is a good way to read potential –

Peace -
