<u>**MFB - Order Flow 7 - Stage Process System**</u>

An Intention to create an intuitive and coherent process, not just a collection of indicator signals

<u>The flow is:</u>

Location → Awareness → Price Response → Structure → Decision.

<u>The "Bird's Eye View" perspective is:</u>

DELTA tells me if buyers or sellers are Active.
PRICE tells me if "Active Delta" is working.
STRUCTURE tells me if I have a trade.

1) **Key level**

   Only consider starting the process if price is at a key level (decision area)

   If price reaches a key level, then proceed to "Awareness".

2) **"Awareness"** – What is the delta at the key level?

   Delta is only to build "Awareness", not for a trade signal.
   The 15 min CISD or 5 min FVG-123 tells us "Structural Evidence"

"Awareness Builds Confidence"

IF Positive Delta → THEN buyers are active.

IF Negative Delta → THEN sellers are active.

IF Balanced/Neutral → THEN no meaningful directional order-flow information. **Let structure speak for itself.**

Next, we wait patiently to see what price does with the aggressive buying or selling at a key level –

3) **Key Level Response**

Did Structure tell us if "Acceptance" or "Reversal" at the key level?

Order Flow — Four Scenarios

🟢 **Bullish Reversal**

Key Level swept ↓ → Negative Delta / Active Sellers → sellers fail → Bullish 15m CISD → Bullish Reversal

🔴 **Bearish Reversal**

Key Level swept ↑ → Positive Delta / Active Buyers → buyers fail → Bearish 15m CISD → Bearish Reversal

🟢 **Bullish Continuation**

Key Level breaks ↑ → Positive Delta / Active Buyers → buyers succeed/acceptance → Bullish 5m FVG-123 → Bullish Continuation

🔴 **Bearish Continuation**

Key Level breaks ↓ → Negative Delta / Active Sellers → sellers succeed/acceptance → Bearish 5m FVG-123 → Bearish Continuation

No-Trade Rule:

Key Level + Delta = Awareness, NOT a trade.

Wait for:

15m CISD → Reversal Evidence

5m FVG-123 → Continuation Evidence

Delta = Who is active?
Price = Are they succeeding or failing?
Structure = Do I have a trade?

DELTA tells me if buyers or sellers are Active.
PRICE tells me if "Active Delta" is working.
STRUCTURE tells me if I have a trade.

Order Flow 7 process:

① **LOCATION —** What key level?

↓

② **AWARENESS —** “Active Delta”?

↓

③ **RESPONSE —** Is “Active Delta” following through?

↓

④ **STRUCTURE —** Reversal or acceptance?

↓

⑤ **SETUP —** 15m CISD reversal or 5m FVG-123 continuation?

↓

⑥ **RISK —** Is there “Corn on the cobb” (room) to the next key level?

↓

⑦ Take the trade, or not.

Reversal path:

Key Level → Sweep → Delta Awareness → “Active Delta” not working (price is not moving in direction of Delta reading → Rejection → 15m CISD → Reversal Framework

Continuation path:

Key Level → Break → Delta Awareness → Successful Price Progress → Acceptance → 5m FVG-123 → Continuation Framework

Peace -
