

Everyone's relationship w/ God's presence within us is different. we're all special...

With an attitude of gratitude humble and quiet in the moment try to sense God's healing light power within your molecules, soul, and body... Ask God to help you with your faith, let's try to take the higher road and keep chewing on the word until we reach higher ground... God will appreciate this and show you favor in grace... speak faith into yourself... God is in everything... May your days be filled with healing and God bless your life... Creativity, discovery, and laughter are 3 essential components that can help us feel better.. Take care. God Bless. Amen... :)
